# Are you looking for help with your water systems ?

## Technical service

Whether it be cooling heating steam process waste we can provide you the technical backup you need

### Cooling towers & Evap. Condensers

- Skilled, professional staff
- On site visits weekly, monthly etc
- Complete solution:

Visits | Chemicals | Cleaning  
Equipment | Softener service  
Sampling | Testkits | Tech support  
Risk assessment | Paperwork

- Colour coded reports
- Produced on site

### Steam Boilers and generators

- Technical visits to site | skilled staff
- Chemical supply  
Many unique products for coil - style steam generators
- vSteam on-line data system helping to keep your boiler at optimum economy

- New-generation Biomass fed boilers catered for too

### Closed system boilers and chillers

- Technical visits & analysis
- Chemical provision  
Solid | Liquid
- Dosing pots, Easytreat feeder
- Side stream filtration
- System cleans
- Sampling for:  
Bacteria | Chemistry

## Speciality chemicals

Innovative solutions for all of the above market areas

### Cooling water:

- Solid and liquid chemicals
- Scale and corrosion inhibitors
- Biocides
- Dispersants & cleaning products
- Pack sizes typically from 10L+
- Large volume pump-over
- Empty drum collection

### LPHW, CHW, Other closed systems

- QuickSticks solid chemical, considerably lowering risk
- Traditional liquid chemicals
- Scale & corrosion inhibitors
- Closed system long life biocides
- Cleaning products

Click here for info

### Steam boilers & Generators:

- Experts in their treatment
- Professional advice
- Optimise running by using our vSteam web based data portal
- Full support includes descaling, water softener service & repair
- Solid & liquid chemical options

Click here for a look at vSteam

## Water monitoring contracts

Colour-coded style throughout for ease

### Water temperature monitoring:

- HSG274 compliance
- Bespoke grids, site specific
- Colour-coded for ease

### Logbooks & paperwork:

- Site specific
- Emphasis on being up to date

### Water sampling:

- UKAS accredited labs
- Bacteriological, chemistry
- Colour coded certificates
- Interpretation not just a certificate

### Risk Assessment:

- Trained and skilled staff
- Colour-coded survey

### Sundry:

- Shower head descales

### Cleaning:

- Water tanks & services
- Chlorination, disinfection

### Descaling:

- Calorifiers, boilers
- Plate heat exchangers

### Water softener:

- Servicing & Repair
- Disinfection

## Equipment

New install | Upgrade | Install

### For cooling, steam, closed systems

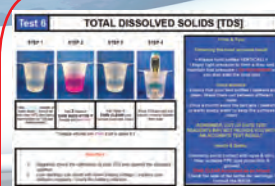

- Dosing pumps
- Controllers
- Dosing pots, sample coolers
- Brominators
- Holding tanks & Bunds
- Water softeners, filters, RO etc

Design | Supply | Install | Maintain

## Testkits:

Easy to use, visual instructions

- Drop tests, strips, sachets
- Complete range
- Clear visual instructions
- Growing video bank of methods
- Rapid delivery

# Product focus

Deep Water Blue

- Add test results
- Results colour code
- Pop-up advice
- Data analysis tools
- Graphing / Trending
- Optimise the running of your system
- Reduce energy, water & chemical consumption
- System emails user when new data added or when a comment is made
- Web-based, cross platform

mobile "app" too!

**QuickSticks®**  
Liquid expertise in a solid stick

- Closed system chemicals in a solid stick
- Minimal splash risk compared to a traditional liquid
- HUGE weight saving
- 3 QS800 sticks [1.25kg] = 26kg drum !
- No drum to dispose of
- Lower carbon footprint
- Significantly easier to carry

- Quality feeder available
- Feeds liquids AND sticks

**colourcode**

- We've been using colour coded reports for 12 years now
- On site
- Lab certificates
- Legionella risk assessments
- Logbooks
- Water temperatures

- It's still years ahead of where everyone else is
- The idea has now gone on-line with vSteam
- Simple yet hugely effective

Coming later in 2015...

**QuickSolv**  
Liquid expertise in a solid

- Cooling water and steam treatment in a solid form
- Significantly safer to use
- Significantly reduced packaging

**vmOnitoring**

- Expansion of vSteam to include general water treatment
- Cooling water - cooling towers & evaporative condensers
- Closed systems - heating, chilled etc
- On-line store of documents for any system
- Colour-coded monitoring

We are expert problem solvers

Please contact us and we'll endeavour to help. This is our commitment to you:
