

Water Treatment and Conditioning of Commercial Heating Systems Guide

ICOM COMMERCIAL HEATING SYSTEMS GUIDE

At a recent event in the City of London, ICOM launched their new closed loop water treatment guidance related to the cleaning, treatment and dosing of closed loop systems. The event was very well attended by key players in the heating and maintenance industry and will be a significant document for referral in the future. To learn more, use this link; <http://icom.org.uk/article/637>

The content of the 60-page guide is designed to cover every aspect of water treatment, from design considerations for new systems through to analysing the water in existing systems and taking appropriate remedial measures where necessary.
